

Docket No. 40101-03901

APPENDIX A

9. (Amended) [A method in the initialization of a device] The method according to claim 6, further comprising the steps of:

determining whether a list of objects from an archive was being committed to a registry area of persistent storage when said device was powered-off; [and]

examining said archive to determine a remaining list of objects to be committed to said registry area when said step of determining establishes that a list was being committed when said device was powered-off; and

committing the remainder of said list established from said examining step.
